²⁹27. (NEW) The frame of claim ²⁷25 including a plurality of elongated flexible poles, each having first and second ends terminating in said substantially common plane, and each having at least one spar flexibly coupled thereto and associated only therewith to form a flexible frame structure.

³⁰28. (NEW) The frame of claim ²⁹27 wherein each of said plurality of poles has a plurality of spars flexibly coupled thereto and associated only therewith to form a flexible structure.

REMARKS

Applicant respectfully requests the Examiner to amend the application by adding new claims 25-28 and to include those claims in the examination of the application.

Respectfully submitted,

William J. Bohler
